Dear Dr. S. Nagesh Bhattu and Dr. S. Karthick,

Hope you all are doing well.

At the outset let me thank you and your team from NIT, Tadepalligudem, AP for participating in the 5G Hackathon conducted by IDRBT recently. We look forward to your teams proposal of developing "Intelligent Banking Kiosk" as a working prototype and to demonstrate it at IDRBT 5G UCL. We would be happy and shall try to provide the resources that may be necessary for carrying out this demonstration work, once we know the details with time lines.

Request you to submit a detailed formal proposal on it to IDRBT 5G UCL, indicating plan of execution with quarterly milestones, duration of the activity, resources required for successful execution etc.

Thanking you,

With Regards,

Dr. V N Sastry,
