

# TECHKRIYA

## 2K25: Visionary & MindMash

### Event Report: 10th & 11th October

**Name of the Event:** Visionary & MindMash

**Date of the Event:** 10th & 11th October 2025

**Name of Secretary:** Krishnapriya Paiavula

#### **Description:**

The **Visionary & MindMash** events were designed to ignite creativity, perception, and quick thinking among participants through a series of engaging, intellectually stimulating activities. Organized as part of the TechKriti celebrations, these events brought together the thrill of visual intelligence, logical reasoning, and fast-paced problem-solving in a dynamic environment.

**Visionary**, a fusion of **AI or Eye** and **HoloVision**, challenged participants to blur the line between illusion and innovation. The event invited students to test their observation and intuition by distinguishing between reality and AI-generated visuals. The futuristic holographic puzzles added a new dimension of interactivity, allowing participants to experience how technology and human perception converge in the age of artificial intelligence. The event not only entertained but also educated students about the growing influence of AI in creative and perceptual domains, inspiring curiosity about emerging tech fields such as computer vision, holography, and digital art.

**MindMash**, on the other hand, was a perfect blend of intellect and fun. Comprising sub-events like **Line Lagao**, **Pic2App**, and **Pictopuzzle**, it tested participants' memory, reasoning, and creative association skills. From completing famous quotes of eminent personalities to identifying popular apps through cleverly designed clues, and decoding hidden words from intriguing picture puzzles, every round brought excitement and challenge. The event encouraged teamwork, quick thinking, and lateral problem-solving while keeping the atmosphere lively and engaging.

Together, **Visionary** and **MindMash** transformed the venue into a hub of innovation and entertainment, attracting a large crowd of curious learners and enthusiastic participants. The events not only showcased the creativity and intellect of the NIT Andhra Pradesh student community but also highlighted the importance of combining technology with imagination. Through their unique formats and immersive experiences, both events successfully encouraged participants to think beyond the obvious, sharpen their perception, and embrace the joy of learning through play.
